

TANK MONITORING PROGRAM

Tank monitoring is a service that allows us to remotely monitor tank fill levels and usage in real time. It provides access to accurate tank level data via an intelligent, web-based management portal.

WHAT ARE THE ADVANTAGES?

- You will never run out of product
- Helps you stay profitable by minimizing or eliminating product outages and costly last-minute orders
- Gives you information on your consumption rates
- Cuts inventory management costs
- Eliminates reporting errors
- Current and historical data is available 24/7

AM I ELIGIBLE TO GET A TANK MONITOR AND WHAT IS THE COST TO ME?

If you sign up with Crevier Lubricants and have a bulk tank of 700L capacity or more, you are automatically eligible. There is no cost to you – we will cover the installation, the equipment and the cost of the portal.

WHAT IS THE PROCESS?

Your business can be up and running in **3 simple steps:**

1. We send someone to conduct a site visit to ensure we are ordering the right equipment for your tank.
2. The monitoring device is installed.
3. Once everything is set up, you will receive instructions on how to access your account on the online portal and we will give you a demo. You can access your consumption data on your computer or your phone and you can request access for up to four people per monitor.

Fill levels, usage and other tank data are displayed in the portal.

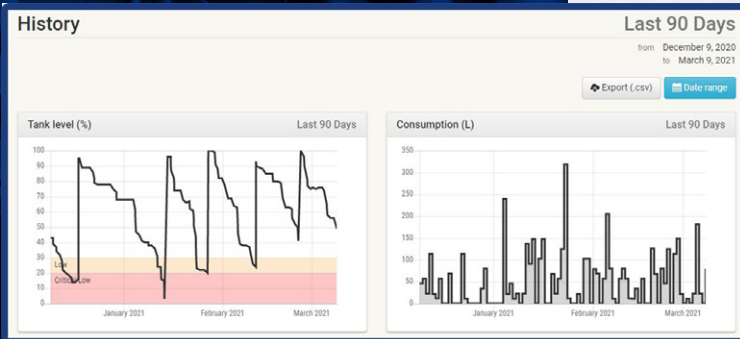

**WE FILL YOUR TANK
AT EACH VISIT
AND WE CALL YOU
72 HOURS PRIOR
TO DELIVERY**

HOW DO I GET STARTED?

Contact your sales representative or give us a call:
