

HD Diesel extended life coolant

DESCRIPTION

Catalys Heavy-Duty Diesel Extended Life Coolant/Antifreeze with ethylene glycol is formulated for Heavy-Duty diesel engines. It contains nitrites for wet-sleeve liner protection against cavitation and pitting along with long-lasting organic acid corrosion inhibitors commonly known as NOAT. It provides protection for more than 500 000 km and can go up to 1 000 000 km with the addition of a liquid extender. It is compatible with the coolants of the various manufacturers using Nitrited Extended Life Technology.

It is available as a concentrate (PC: 99-0724) or a 50/50 pre-dilute (PC: 99-0725).

APPROVALS

Meets the following specifications: ASTM D-6210, TMC RP-329 Type A, ASTM D-4985, ASTM D-3306, TMC RP-302A, CAT EC-1.

Designed for Caterpillar, Volvo/Mack, John Deere, Paccar (Kenworth & Peterbilt), Cummins, Freightliner, GM, Ford, International, New Holland, J.I. Case.

Properties	Test ASTM	Results
Colour	---	Red
Specific Gravity at 15°C	D1122	1,12
Freezing Point (diluted at 50% with water), °C	D1177	-37
PH, (diluted at 50% with water)	D1287	8,0
