

Demtac 16 Bio

Performance and applications

DEMTAC 16 BIO is a biodegradable concrete form oil specially formulated to facilitate demolding and be safe for environment.

Joined the main properties of our **DEMTAC 16 BIO** :

- makes the removal easier;
- insures a smooth finish of the concrete;
- protects the forms from corrosion;
- excellent adherence to the metal;
- increases the durability of the forms.

This product can be applied on steel, wood, aluminium or plastic molds.

DEMTAC 16 BIO is easy to apply and meets the biodegradability test OECD 301B > 60% biodegradable @ 28 days. This means it will break down quickly without leaving any harmful elements in the space where it is used.

Specifications

| | DEMTAC 16 BIO |
|-----------------------|----------------------|
| Density (kg/L @ 15°C) | 0,910 |
| Viscosity cSt @ 40 °C | 15,6 |
| Pour point (°C) | -24 |
| Flash Point (°C), min | 182 |
| Biodegradability (%) | > 80 |
| Color, typical | 2,5 |
